

YOUR MAIN ENGINE IS A VITAL PIECE OF YOUR BOATS SAFETY EQUIPMENT!

Could you change a blocked main fuel filter and re-prime the fuel system?

Could you replace your water pump impeller after the engine has overheated?

Or do you want to reduce some of your running costs by servicing your own engine?

This RYA certified 10 hour modular course will not only look in detail at fuel & cooling systems etc , but all other important aspects of your engine and its installation.

In addition it will also cover small outboard motors, in particular the HONDA 2hp a popular engine used on many tenders by cruising folk.

The course will be run by Howard Jeffs an ex military marine engineer, Yachtsman, Kayaker and Mountaineer. For more information and booking form call 0774-0554618 or email h.n.jeffs@btinternet.com
